

January 30, 2025

Dear Concrete Pavement Professionals,

The Southwest Concrete Pavement Association (SWCPA) is the only contractor focused association working exclusively in California and Nevada to advance and improve the concrete pavement roadbuilding industry.

Our partnerships are the cornerstone of our success. With deep connections to paving contractors, Caltrans, NevadaDOT, FHWA, state and local agencies, pavement research engineers, and national concrete pavement groups, we have never been in a stronger position to drive positive change. Your support further empowers us to:

- Expand our educational programs, elevating the skill and proficiency levels of concrete pavement professionals throughout California and Nevada.
- Advocate for the widespread use of concrete pavements for roads, parking areas, highways, and airfields.
- Improve concrete pavement standards and project designs to help deliver superior pavement project outcomes while mitigating risks for our member companies.

Together, we possess the collective strength and expertise to effect meaningful change in our industry. I am excited about our opportunities for 2025. Thank You! for your ongoing commitment to our successful future.

Best regards,

Charles Stuart
Executive Director
Southwest Concrete Pavement Association

Contractor Category/Types: Contractor annual dues are determined by calculating the dollar value of the awarded concrete pavement work* in CA and NV over the past 3 years. This calculation results in a total value for the 3 year period that determines the dues category. **Type 1:** \$25 million and up over the past 3 year period. **Type 2:** \$4 million to \$25 million over the past 3 year period. Under \$4 million per year is considered Specialty Contractor.

*Concrete Pavement Work includes, Highway Pavements, Airport Pavements, Streets & Roads, Parking Areas, Pervious Paving, Full & Partial Depth Patching, Slab Stabilization, Grinding & Grooving, Joint & Crack Sawing & Sealing, Retrofitting Dowel Bars & Tie Bars, Cement Stabilized Bases, Lean Concrete Bases, Shoulders, and Barriers.
